1 Project background

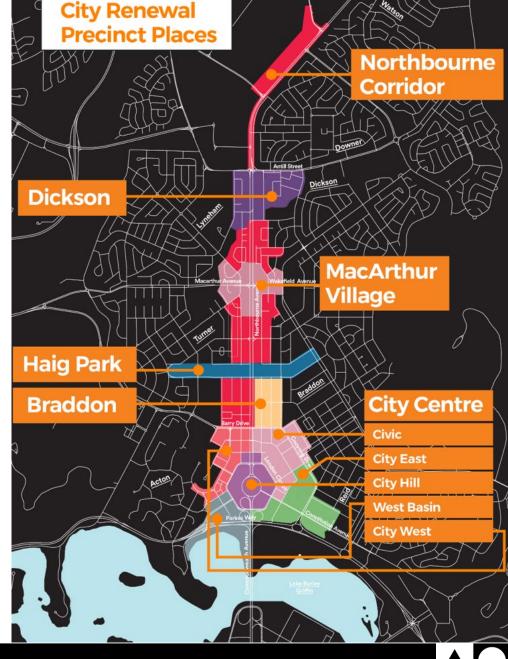

#### Background

In May 2021, the City Renewal Authority commissioned an independent research agency to measure place success within its renewal precinct.

We asked a demographically diverse group of Canberrans how safe, comfortable and clean they find each of the Authority's areas.

Feedback from this research will help us to make further improvements to these areas and prioritise our work.

### 4 Conclusion

#### Conclusion

Ratings of safety and comfort are relatively high across Braddon, Civic and Dickson, and Braddon is also the cleanest area.

The cleanliness of Civic is polarising: with the second highest rating for clean and the second highest rating for unclean, the Civic experience notably varies for different members of the Canberra public

Dickson, while safe and comfortable, scores highest for unclean.
