## 1. Information and Background

This information is provided for road maintenance and road building suppliers interested in offering their services to ACT Government agencies as fire trail contractors.

Infrastructure Canberra, will maintain a Register of prequalified fire trail contractors. This Register is available on the Infrastructure Canberra website at <https://www.act.gov.au/infrastructurecanberra/supplying-to-government/prequalification#supplier-lists>

ACT Government agencies, in consultation with Procurement ACT, will undertake procurement activities for these works in accordance with the Government Procurement Act 2001, at:

<https://www.legislation.act.gov.au/a/2001-28/> and <https://www.procurement.act.gov.au/policy-and-resources/factsheets-and-policies>.

Prequalification of fire trail contractors is consistent with the general prequalification of construction industry contractors under the ACT Government Scheme that has operated since 1993. The main Scheme objectives are:

- (a) implement good risk management practices to minimise the risk to both the Territory and subcontractors associated with a company's poor performance and/or financial failure;
- (b) promote environmentally sustainable practices in the construction industry; and
- (c) encourage efficiencies in tendering processes to make it easier for firms to do business with the ACT Government.

Please also note that prequalification is a Condition of Tender and therefore must be maintained during the life of any contract issued to a provider as a result of that Tender / Expression of Interest / Request for Offer.

Prequalification applications generally require thirty (30) work days to process.

## 2. Procurement Process for Fire Trail Contractors

ACT Government agencies will obtain the best value for money in accordance with the quotation and tender threshold requirements of the [Government Procurement Act 2001](#)

Prequalification is not to be construed as a guarantee of work.

## 3. Explanation of general eligibility prequalification criteria

The awarding of prequalification certification is assessed on the following criteria:

- Acceptable Insurances;
- Technical Capacity;

- Quality / Occupational Health & Safety & Rehabilitation / Environmental / Traffic Management Plans; and
- Secure Local Jobs Code Certificate.

(a) **Insurances**

All fire trail contractors will require public liability (generally not less than \$20 m) and workers compensation policies. Other insurances may also be necessary. Evidence of insurances must be submitted with the application.

(b) **Technical Capacity**

Technical capacity is broadly defined as having recent previous experience as a fire trail contractor, or in related construction fields.

To meet these requirements, the contractor must provide information that demonstrates expertise or specialisation past experience, staffing levels, management and administration capabilities which includes the use of sub-contractors and consultants and plant and equipment resources.

Evidence of relevant and current licences applicable for this prequalification category to practice in the Australian Capital Territory is also to accompany this Application.

(c) **Quality / Occupational Health Safety & Rehabilitation / Environmental / Traffic Management Plans**

Applicants will need to submit recent examples of the above with their application.

(d) **Australia Procurement and Construction Council (APCC) National Code of Practice for the Construction Industry (Code)**

Applicants need to acknowledge general compliance with the principles of the Code.

The Code is applicable to the activities of both the applicant seeking prequalification and the ACT Government agency.

The Code and associated documents can be downloaded from [www.apcc.gov.au](http://www.apcc.gov.au).

(e) **Secure Local Jobs Code.**

Applicants will be required to hold a Secure Local Jobs Code (SLJC) Certificate issued in accordance with the SLJC legislation prior to being granted Prequalification. Information on how Applicants can apply for a secured Local Jobs Certificate:

- <https://www.procurement.act.gov.au/secure-local-jobs>

Applicants are required to retain a Secure Local Jobs Code certificate issued in accordance with the SLJC legislation while they are prequalified.

#### **4. Prequalification Validity**

Prequalification periods will generally be for a nominal period of thirty-six (36) months and renewal shall be in accordance with requirements that are in force at the time of renewal.

Prequalification of contractors is required to be in place **at the close of invitations / tenders**. Normal assessment processes are applied after the close of invitations / tenders.

#### **5. Notification and Appeals**

The Prequalification Registrar issues advice notifying all applicants whether or not they have been successful. Prequalification can be withdrawn at any time on it becoming apparent that a contractor is unable to satisfy any or all of the prequalification criteria.

In the event of a contractor appealing the result of their application, the following procedures apply:

- (a) The appeal is lodged with the Executive Group Manager, Major Projects Canberra. The appeal is to include a statement identifying the precise determination against which the appeal is made and provide reasons why the decision should be set aside or reviewed;
- (b) The Executive Group Manager will consider the appeal in conjunction with a suitable panel and determine whether or not the appeal is to be upheld or rejected; and
- (c) The appellant will be advised in writing of the determination. If the appeal has been unsuccessful, the reasons for rejecting the appeal will be given.

#### **6. Confidentiality and Information Sharing**

By submitting a prequalification application the applicant authorises the Territory to provide to any Territory, State or Commonwealth government agency (including any regulatory or law enforcement body, which includes, without limitation, WorkSafe ACT) as evidence of the applicant's consent to allow that agency to release information as requested by the Territory to any Territory, State or Commonwealth government agency.

The Territory may refer an applicant's documentation to an external agency or assessor for information sharing or assessment. Such entities are required to maintain confidentiality of all information received.

Information submitted in an application for prequalification will be treated as commercial-in-confidence and will not be disclosed to any party outside the Territory and its agencies and assessors unless the Territory is legally required to do so for the purposes of obtaining legal or financial advice in the context of the applicant's prequalification application.

Once prequalified, a prequalified supplier's details, including details of its performance of contracts awarded, may be shared with Territory and other government agencies for the purpose of monitoring contract performance and to determine continued eligibility for prequalification.

Prequalified suppliers' details will be notified on the Infrastructure Canberrawebsite <https://www.act.gov.au/infrastructurecanberra/supplying-to-government/prequalification#supplier-lists>
