

What's happening on site in April

This update summarises construction activities and outlines any expected impacts or disruptions to the community.

Construction highlights for April include the ongoing installation of the site's prefabricated timber framing and works on the main building's façade. Scaffolding will continue to be removed from the main building's lower floors, making way for early service works and fitouts. Works will continue to prepare the footprint of the Woden Public Transport Interchange and shelters on Callam Street.

Key:

- | | |
|---|---|
| 1. Installation of prefabricated timber | 5. Callam Street piling and footing works |
| 2. Installation of main building façade | 6. Pavement build up of interchange footprint |
| 3. Scaffold stripping | 7. Installation of in-ground services |
| 4. Service installation and fitouts | |

Description of main construction activity

1. Installation of prefabricated timber

Timber beams, columns and floors will continue to be installed from level 3 up. Prefabricated timber will continue to be delivered on site.

2. Installation of main building façade

Installation of the glazed façade with terracotta battens will continue on the east side of the main building.

3. Scaffold stripping

Scaffolding will be removed on the lower floors to allow fitout and façade works to commence.

4. Service installation and fitouts

Services installation and fitout work will commence in the basement and on the lower floors.

5. Callam Street piling and footing works

Piling and capping works will continue to prepare Callam Street for the new transport interchange shelters.

6. Pavement build up of interchange footprint

Callam Street pavement is being built up to form the transport interchange footprint.

7. Installation of in-ground services

Installation of service crossings, in ground services, and light pole footings will continue on Callam Street.

The CIT Woden Campus façade design mimics the Brindabella ridgeline and the colours take inspiration from rivers and native gum trees around Canberra. It features vertical terracotta battens which will allow natural light to filter through, creating a captivating and calming space for students and staff.
