

ACT Weekly Respiratory Surveillance Report

Reporting period Friday 16 May 2025 to Thursday 22 May 2025 inclusive.

Table 1: Notifications of COVID-19, influenza and RSV, ACT, between 16 and 22 May 2025

	COVID-19			Influenza			Respiratory Syncytial Virus (RSV)		
	Current reporting period ^a	2025 Total ^{bc}	Rate per 100,000 ^d for reporting period	Current reporting period ^a	2025 Total ^{bc}	Rate per 100,000 ^d for reporting period	Current reporting period ^a	2025 Total ^{bc}	Rate per 100,000 ^d for reporting period
Total Cases	88	1,174	18.5	153	1,128	32.2	86	536	18.1
Age group (years)									
0-4	17	65	65.2	18	81	69	57	232	218.4
5-19	12	91	14.3	76	299	90.3	10	47	11.9
20-64	44	565	14.7	49	543	16.4	13	126	4.3
65+	15	377	22.6	10	185	15.1	6	53	9

^aCases notified to ACT Health during the reporting period.

^bTotal cases since 1 January 2025.

^cDue to data cleaning, the total number of cases reported will not necessarily equal last week's total plus new cases reported this week.

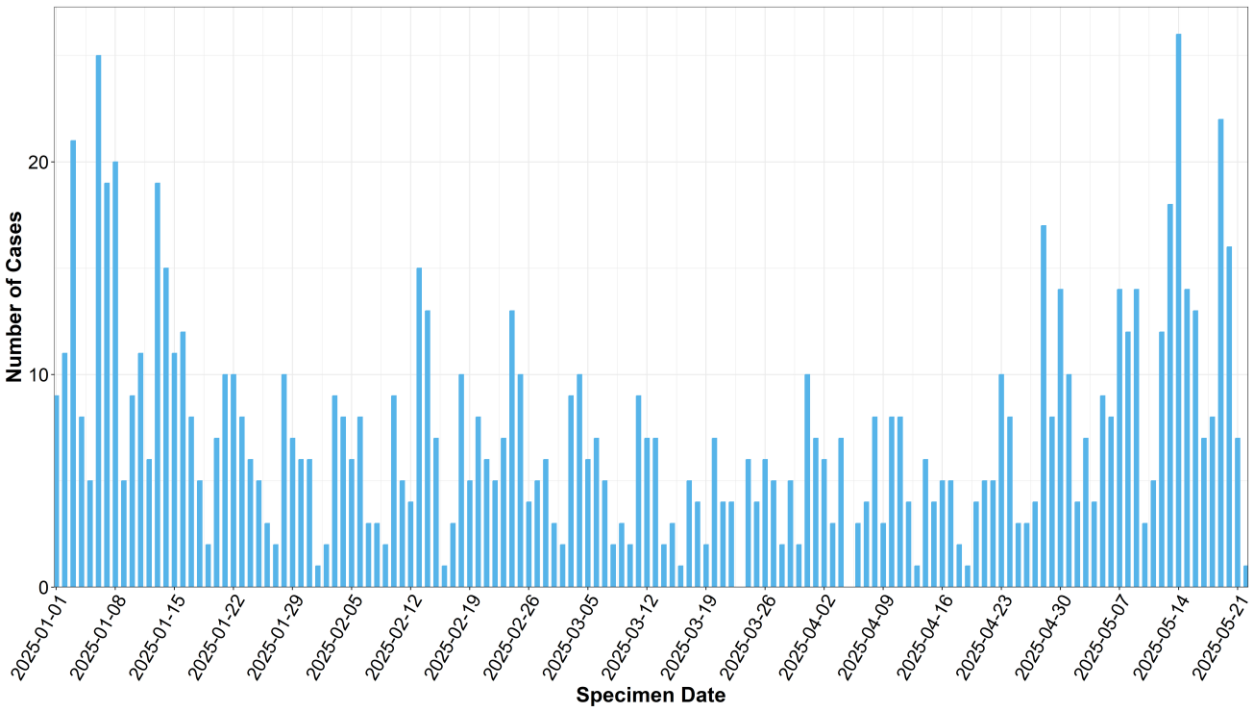

^dRate per 100,000 population for the given time period. Population data are based on the ABS Estimated Resident Population (ERP) as at December 2024.

ACT COVID-19, Influenza, and RSV Epidemiology Overview

Prepared by ACT Health

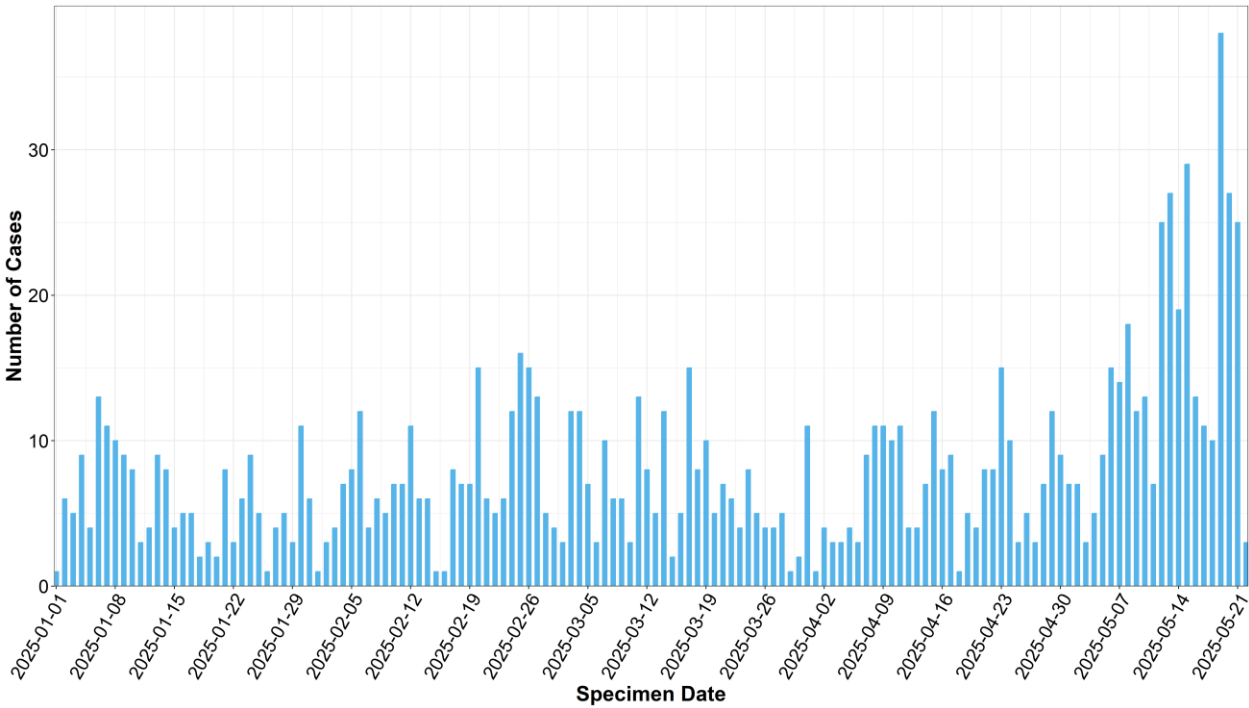

Figure 1: COVID-19 notifications since 1 January 2025 by specimen date^a

^aThe data includes laboratory-confirmed cases of COVID-19 reported to ACT Health. Due to the case processing system, there is a small proportion of cases that will not appear before the end of the cut-off period. This will result in an under-reporting of the case numbers for the 48 hours prior to the cut-off period.

Prepared by ACT Health

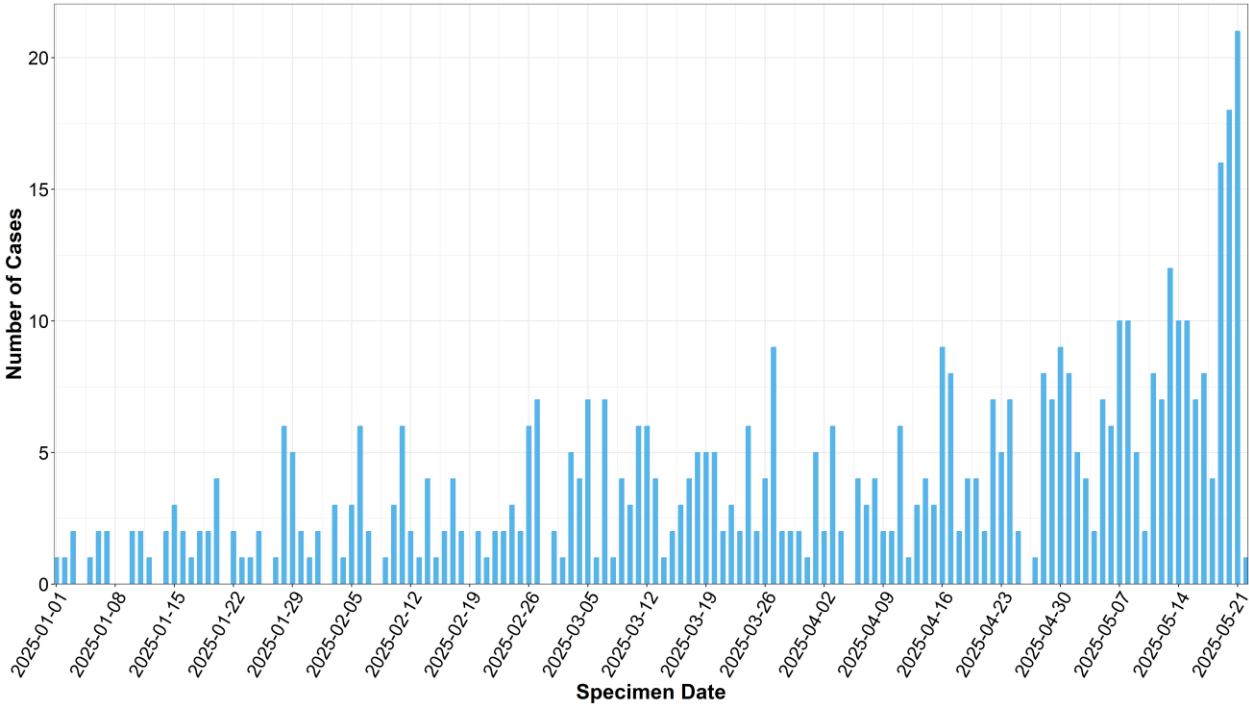

Figure 2: Influenza notifications since 1 January 2025 by specimen date^a

^aThe data includes laboratory-confirmed cases of influenza reported to ACT Health. Due to the case processing system, there is a small proportion of cases that will not appear before the end of the cut-off period. This will result in an under-reporting of the case numbers for the 48 hours prior to the cut-off period.

Prepared by ACT Health

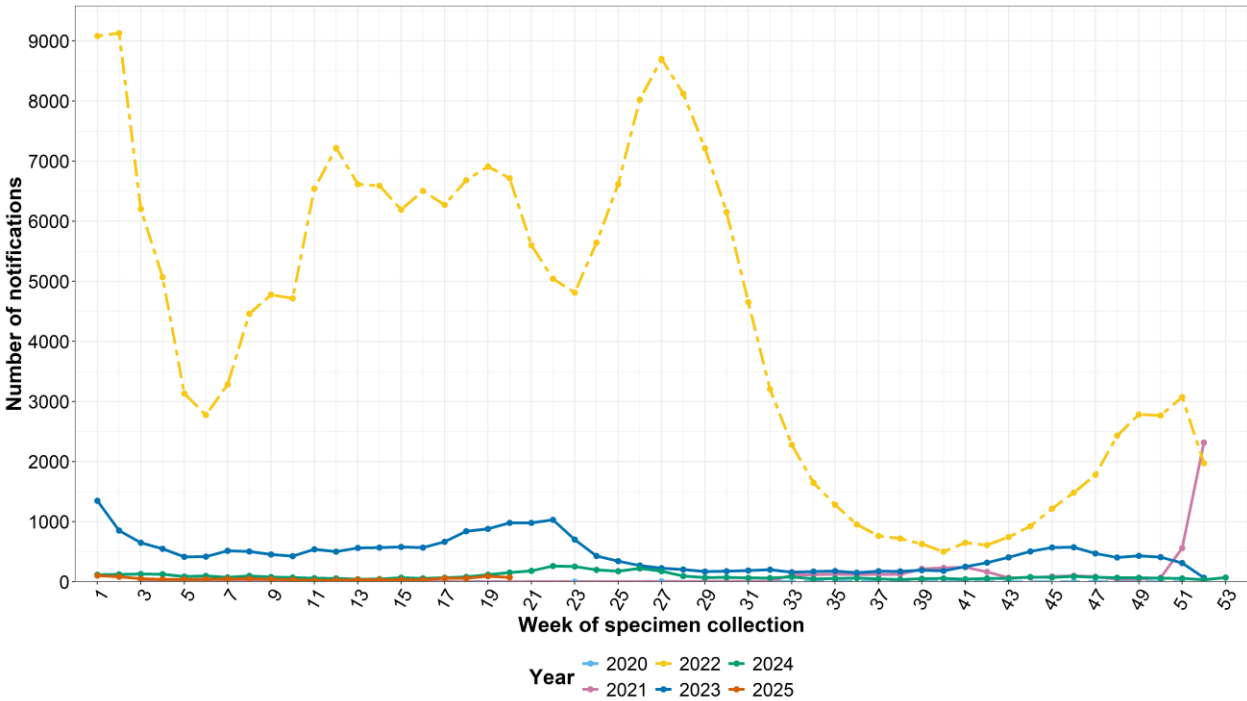

Figure 3: RSV notifications since 1 January 2025 by specimen date^{ab}

^aThe data includes laboratory-confirmed cases of RSV reported to ACT Health. Due to the case processing system, there is a small proportion of cases that will not appear before the end of the cut-off period. This will result in an under-reporting of the case numbers for the 48 hours prior to the cut-off period.

^bRSV became a notifiable condition in the ACT from 21 February 2022.

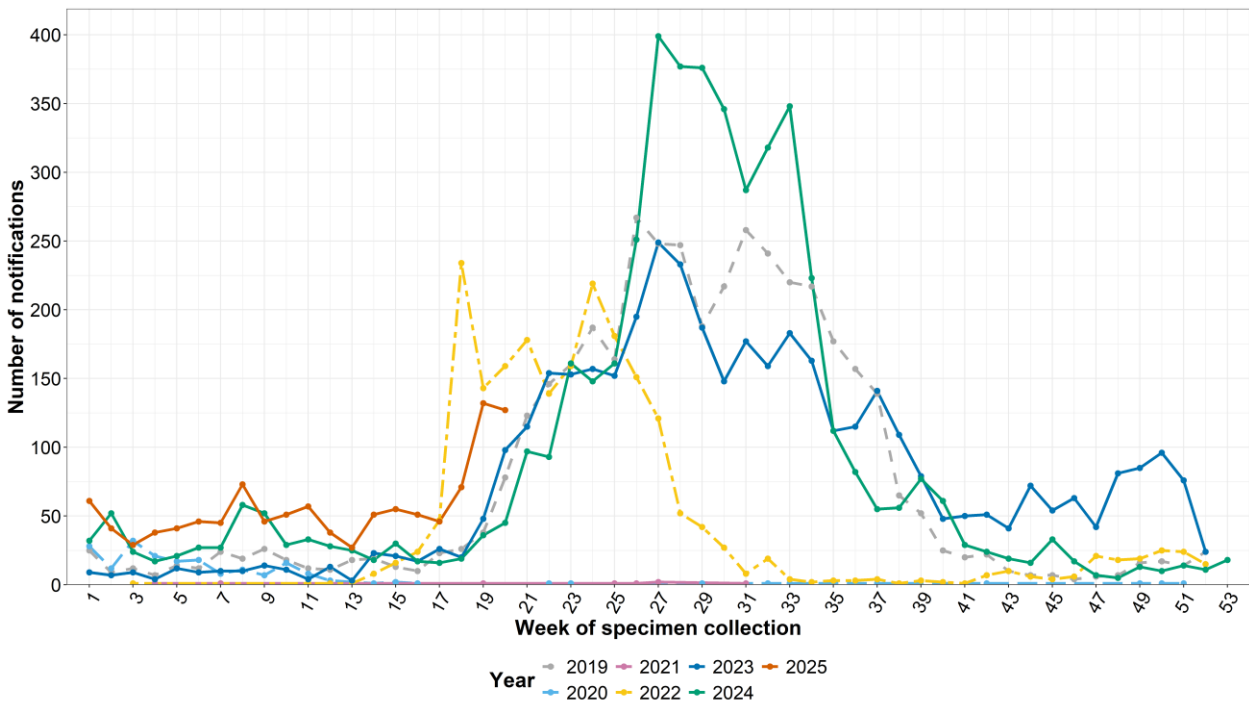

Figure 4: Number of COVID-19 notifications, by week and year of specimen collection^a

^aDue to the case processing system, there is a small proportion of cases that will not appear before the end of the cut-off period. This may result in an under-reporting of the case numbers for the 48 hours prior to the cut-off period.

Prepared by ACT Health

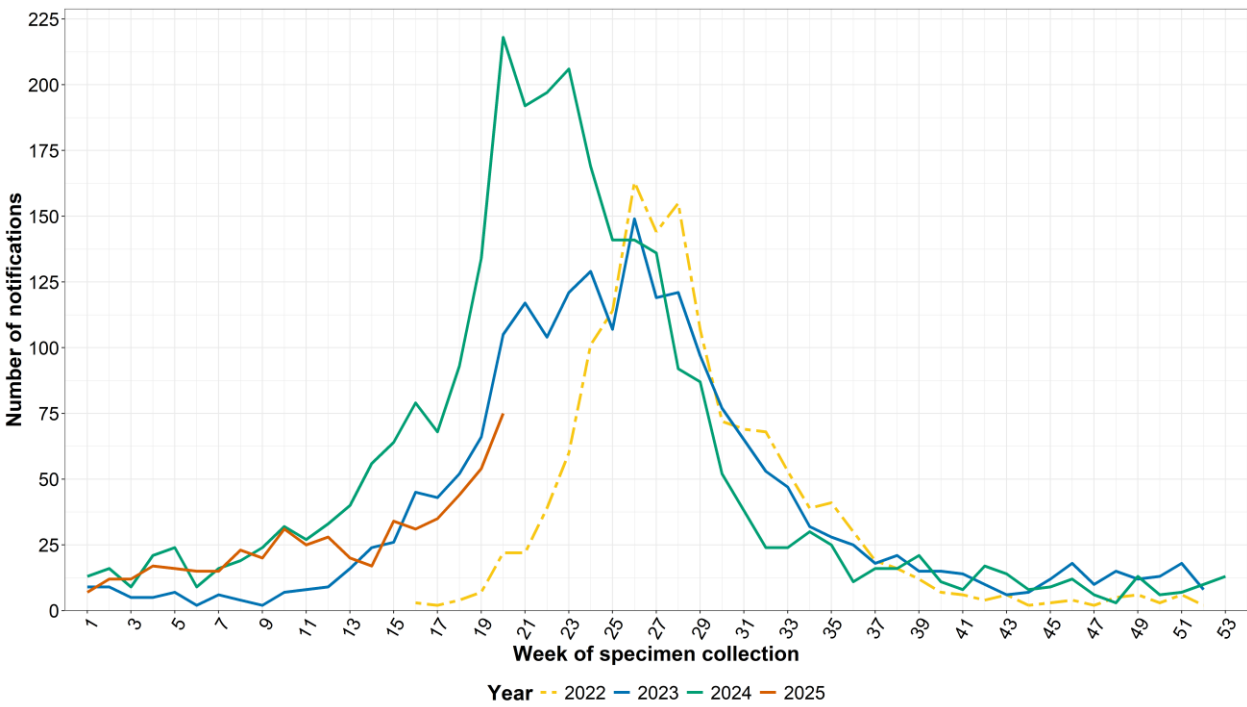

Figure 5: Number of laboratory-confirmed influenza notifications, by week and year of specimen collection^a

^aDue to the case processing system, there is a small proportion of cases that will not appear before the end of the cut-off period. This may result in an under-reporting of the case numbers for the 48 hours prior to the reporting period.

Prepared by ACT Health

Figure 6: Number of laboratory-confirmed RSV notifications, by week and year of specimen collection^{ab}

^aDue to the case processing system, there is a small proportion of cases that will not appear before the end of the cut-off period. This may result in an under-reporting of the case numbers for the 48 hours prior to the reporting period.

^bRSV became a notifiable condition in the ACT from 21 February 2022.
