

Light Rail to Woden Construction Update

May 2023

**BUILT
FOR
CBR**

Construction notification

The ACT Government is investing in infrastructure to benefit the lives of all Canberrans. The Light Rail to Woden project is being Built for CBR to create a more connected, sustainable, and vibrant city. This construction notification provides an update of expected activity in May on raising London Circuit – an enabling project for light rail to Woden.

We are continuing to modify the Edinburgh Avenue and London Circuit intersection and undertaking utility investigations and installations. As part of this work, we will be removing three car parking spaces on Edinburgh Avenue, close to the London Circuit intersection. The spaces will be removed during standard construction hours on **15 May 2023** and are expected to be reinstated by the end of July 2023. Alternate parking spaces can be found further west on Edinburgh Avenue or on Marcus Clarke Street.

During this time, the footpath next to these car parks will also be closed. Pedestrians are advised to use the footpath running parallel to this one (closest to the Metropolitan Building).

While this work is being carried out there will be some disruption to traffic (including lane closures) and pedestrian diversions in place. Local and pedestrian access to the Metropolitan Building and the QT Hotel will always be maintained.

How will this work affect you?

While we make every effort to minimise construction disruption and impacts to the community, at times you can expect to experience higher levels of noise and dust, traffic, pedestrian, and cyclist changes involving detours and an increase in construction vehicle movements. Throughout construction we will continue to notify of upcoming work, and we will monitor our activities and adjust our controls where needed.
