Protocol
Review of decision to either not issue or revoke an IRE Certificate

Where a Building Entity is not granted an IRE Certificate, the Building Entity may request a review of the decision not to award it an IRE Certificate by submitting a written submission to the Executive Director, Infrastructure, Finance & Capital Works (ED, IFCW).

The ED, IFCW will consider the Building Entity's grounds for review in the conjunction with the recommendations of the approved IR Auditor.

IFCW will communicate the determination to the Building Entity within ten (10) business days of a determination being made.

Where a Building Entity is found to have been subject to an adverse ruling from one or more of the regulatory authorities named in the Strategy, the ED IFCW will make a determination on the appropriate action in terms of the level of seriousness of the adverse ruling and may choose to initiate any of the following actions:

(a) take action against the Building Entity as provided for in any contract with the Territory;

(b) take that adverse ruling into consideration in assessing the Building Entity's performance for future tendering opportunities;

(c) revoke the IRE Certificate of the Building Entity;

(d) suspend the Building Entity from renewing its IRE Certification for a period of up to 12 months, or a lesser period as may be determined; and

(e) place conditions on the Building Entity's retention of its IRE Certificate.

In the event that the ACT Government decides to suspend or revoke a Building Entity's IRE Certificate or place conditions on it the Building Entity may seek a review of that decision by the ED, IFCW.

IFCW will communicate the determination to the Building Entity within ten (10) business days of the determination being made.
