# 1. Introduction

This document provides a list of critical no-clinical systems that are in use across the Canberra Health Services (CHS) sites. These systems have been categorised under various system types and includes the system manufacturers/vendors that are used for each system.

Although this document endeavours to capture information at a high level, it is not intended to provide detailed technical information for the systems or the specific model numbers for each system.

## 2. Security Systems

### 2.1. Access Control

The access control system is a security management system that manages physical access to nominated areas within a building.

#### 2.1.1. Manufacturer

The system is provided by Tyco/Software House.

#### 2.1.2. System Components

The following components are used for the access control system:

- C-Cure 9000 Servers installed in a highly available configuration;
- iStar door controllers; and
- Card readers, electric strike and various other door hardware.

### 2.2. Fixed Duress

Fixed Duress is provided in various areas/rooms based on the business requirements.

#### 2.2.1. Manufacturer

The system is provided by Tyco/Software House.

#### 2.2.2. System Components

The following components are used for the fixed duress system:

- C-Cure 9000 Servers installed in a highly available configuration;
- iStar door controllers; and
- Duress buttons using dry contact.

### 2.3. Alarms

This system is involved in raising alarms.

#### 2.3.1. Manufacturer

The system is provided by Tyco/Software House.

#### 2.3.2. System Components

The following components are used for the alarm system:

- C-Cure 9000 Servers installed in a highly available configuration;
- iStar door controllers; and
- Alarms.

### 2.4. Closed Circuit TV

This system provides Closed Circuit TV (CCTV) monitoring and recording of the CCTV footage.

### 2.4.1. Manufacturer

The system is provided by Avigilon.

### 2.4.2. System Components

The following components are used for the CCTV system:

- IP CCTV cameras – indoor and outdoor;
- CCTV cameras must be able to leverage Power over Ethernet (POE) or POE+;
- Network Video Recorder (NVR). Must support IP network connectivity; and
- External CCTV cameras potentially installed on Hex Poles.

## 2.5. Help Points

The help points are provided in areas where public safety is important.

### 2.5.1. Manufacturer

The system is provided by Jacques Technologies.

### 2.5.2. System Components

The following components are used for the help points system:

- Voice and video call points; and
- Must support IP network connectivity.

## 2.6. Key Management Solution

The electronic key management data cabinets are used to secure, manage and provide audit facility for the use of every key within the cabinet.

### 2.6.1. Manufacturer

The system is provided by Traka Assa Abloy.

### 2.6.2. System Components

The following components are used for the CCTV system:

- Key cabinet;
- Smart Traka software; and
- Must support IP connectivity.

## 2.7. Security Monitoring

### 2.7.1. Company

After-hours and offsite security monitoring is provided by SNP Security.

## 2.8. Data Cabinets Security Locks

### 2.8.1. Manufacturer

The system is provided by Enlogic.

### 2.8.2. System Components

The following component is affected by this system:

- IP data cabinet locks.

# 3. Life Critical

## 3.1. Nurse Call

There are currently several nurse call systems installed at the ACT health Directorate.

### 3.1.1. Manufacturers

The systems are provided by Hills, Rauland and Tacera.

### 3.1.2. System Components

The following component are included in this system:

- Servers provisioned in highly available configuration;
- Buttons that provide nurse call, nurse assist etc;
- Annunciators; and
- Over door lights.

# 4. Building Management

## 4.1. Building Management and Control System

### 4.1.1. Manufacturer

The system is provided by Siemens.

### 4.1.2. System Components

The following component are included in this system:

- Meters;
- Controllers;
- Sensors; and
- Uses BACnet protocol.

## 4.2. Digital Addressable Lighting Interface

### 4.2.1. Manufacturer

The system is provided by Clipsal.

### 4.2.2. System Components

The following component are included in this system:

- Addressable lighting;
- Sensors;
- Switches; and
- IP addressable.

## 4.3. Lift Controllers

### 4.3.1. Manufacturers

There are several lift providers at The Canberra Hospital.

### 4.3.2. System Components

The following component are included:

- Controllers;
- Direct Current (DC) cabling.

## 4.4. Consumer Locks

### 4.4.1. Manufacturer

This is provided by Salto.

### 4.4.2. System Components

- Reader;

- Hospitality card; and
- 802.15.4 Zigbee mesh network.

## 4.5. Master Clocks

### 4.5.1. Manufacturer

The clocks are provided by Krontech.

### 4.5.2. System Components

- IP Clocks; and
- Supports Network Time Protocol.

## 4.6. Fire Indicator Panel

### 4.6.1. Manufacturer

The fire indicator panels are provided by various manufacturers.

### 4.6.2. System Components

- Serial PRN to IP Moxa.

# 5. Messaging System

## 5.1. Messaging Engine

The messaging engine integrates with various systems.

### 5.1.1. Manufacturer

The messaging engine is provided by Ascom.

### 5.1.2. System Components

- DURAsuite appliances;
- Software components;
- Support for High Level Interface connection with other systems; and
- Must support IP connectivity.

## 5.2. Messaging Integration Engine

### 5.2.1. Manufacturer

The messaging integration engine is provided by Spok.

### 5.2.2. System Components

- System appliances and servers;
- Software components;
- Support for High Level Interface connection with other systems; and
- Must support IP connectivity.

## 5.3. Paging

### 5.3.1. Manufacturer

The paging system is provided by Vitacom.

### 5.3.2. System Components

- Server appliances or virtual;
- Software components;
- Support for High Level Interface; and
- Must support IP connectivity.

# 6. Audio Visual Systems

## 6.1. Patient Information and Entertainment System

### 6.1.1. Manufacturer

The Patient Information and Entertainment System (PIES) is provided by various vendors.

### 6.1.2. System Components

- Server appliances or virtual;
- Software components;
- Support for High Level Interface; and
- Must support IP connectivity.

## 6.2. IP Television

### 6.2.1. Manufacturer

The IPTV is provided by Exterity.

### 6.2.2. System Components

- Television;
- Digital Media Player;
- Digital Media Manager;
- Transcoders; and
- Encoders.

## 6.3. Video and Audio Conferencing

### 6.3.1. Manufacturer

The Video conferencing and collaboration solution is provided by Cisco.

### 6.3.2. System Components

- Integrated Cisco Webex video conferencing units of various sizes based on the room size and requirement; or
- Commercial television and video conferencing unit such as Cisco Webex Room Kit.

## 6.4. Digital Signage

### 6.4.1. Manufacturer

The digital signage is provided by Exterity.

### 6.4.2. System Components

- Television; and
- Digital Media Player.

## 6.5. Digital Way Finding

### 6.5.1. Manufacturer

The digital way finding is provided by Exterity.

### 6.5.2. System Components

- Television;
- Digital Media Player; and
- Dedicated kiosks.

## 6.6. Theatre/Full AV

### 6.6.1. Manufacturer

The is provided by Celestron.

### 6.6.2. System Components

- Controllers;
- Amplifiers;
- Speakers; and
- Microphones.

# 7. Unified Communications

## 7.1. SIP Exchange

### 7.1.1. Manufacturer

The provider is Asterix Open Systems.

### 7.1.2. System Components

- Voice over Internet Protocol (VoIP) exchange.

## 7.2. Digital Voice Exchange

### 7.2.1. Manufacturer

The provider is Cisco.

### 7.2.2. System Components

- Cisco unified Communications Manager;
- Appropriate hardware; and
- Cisco IP phones.

## 7.3. Instant Messaging

### 7.3.1. Manufacturer

The provider is Cisco.

### 7.3.2. System Components

- Jabber software.

## 7.4. Room Booking

### 7.4.1. Manufacturer

The provider is Evoko.

### 7.4.2. System Components

- Room booking panels; and
- Integration with Microsoft Outlook.

# 8. Location Tracking Systems

## 8.1. Real Time Location System

### 8.1.1. Manufacturer

The provider is Ekahau.

### 8.1.2. System Components

- Corporate wireless network;
- Ekahau software; and
- Servers.

## 8.2. Asset Tracking

### 8.2.1. Manufacturer

The provider is Motorola or Olinqua.

### 8.2.2. System Components

- Corporate wireless network;
- Software Topcat/Hardcat or other; and
- Server.

## 8.3. Sterilised Asset Tracking

### 8.3.1. Manufacturer

The provider is to be determined.

### 8.3.2. System Components

- Barcode readers;
- Exciters;
- Server; and
- Software.

## 8.4. RFID

### 8.4.1. System Components

- Exciters; and
- RFID labels.

# 9. Wireless Network and Services

## 9.1. Network

### 9.1.1. Manufacturer

The wireless network equipment is provided by Cisco. The wireless network is installed, configured and managed by ACT Government.

### 9.1.2. System Components

- Wireless access points;
- Wireless LAN Controllers; and
- Appropriate software.

## 9.2. Mobile Duress

### 9.2.1. Manufacturer

The provider is Ascom.

### 9.2.2. System Components

- DURAsuite hardware;
- Software; and
- High level interface.

# 10. Network

## 10.1. Local Area and Wide Area Network

### 10.1.1. Manufacturer

The LAN and WAN network is provided by Cisco.

### 10.1.2. System Components

- Core, distribution and access layer network switches; and
- Installed, configured and managed by ACT Government.

## 10.2. Starlight Foundation Services

### 10.2.1. Manufacturer

Not applicable.

### 10.2.2. System Components

- Children's channel which integrates with PIES.

## 10.3. Ronald McDonald House

Ronald McDonald house has separate network.

## 10.4. Australian National University

Primarily this is a separate network. However, ANU leverage ACT Government network which is made accessible to ANU via a separate Service Set Identified (SSID).

# 11. Transmission Systems

## 11.1. Physical Fibre Network

### 11.1.1. Manufacturer

The provider is AFC group.

### 11.1.2. System Components

- Single mode and multi-mode fibre; and
- MTP fibre network using Lucent Connector (LC).

## 11.2. Territory Radio Network

### 11.2.1. Manufacturer

The provider is Motorola.

### 11.2.2. System Components

- Trunk radio network;
- Antenna; and
- TRN handsets.

## 11.3. Distributed Antennae System

### 11.3.1. Manufacturer

DAS is provided by the three major carriers i.e. Telstra, Optus and Vodafone.

### 11.3.2. System Components

- The components required to support 3G, 4G and 5G.

# 12. Miscellaneous

## 12.1. Neo Natal ICU Baby Monitor

### 12.1.1. Manufacturer

There are various providers involved with this system.

### 12.1.2. System Components

- NICUCAM;
- CCTV camera; and
- RFID excitors and wrist/ankle bands.

## 12.2. Pneumatic Tube System

### 12.2.1. Manufacturer

The provider is Lamson.

### 12.2.2. System Components

- Pneumatic tube infrastructure.
