Work Health and Safety Policy Statement

Major Projects Canberra's Safety is our number one priority. Health and safety is integral in everything we do and actively contributes to our success in procuring and delivering infrastructure projects that helps ensure Canberra remains one of the world's most liveable cities.

Our Work Health and Safety (WHS) Policy reflects our commitment to working closely with our partners in industry and across government to deliver safe outcomes for our workers and on our projects. This WHS policy is supported by the Work Health and Safety Management System (WHSMS) and a suite of WHS topic-specific core processes, guidelines, work instructions, training, templates and forms.

Statement of Commitment

MPC is committed to:

- Providing a workplace that enables all work activities to be carried out safely. We will take all reasonably practicable measures to eliminate or minimise risks to the health, safety and welfare of our workers and others affected by our undertakings.
- Ensuring we comply with the *Work Health and Safety Act 2011* (the Act). We will also comply with any other relevant legislation, applicable Codes of Practice and ACTPS WhoG policies as far as possible.
- Identifying hazards, assessing and controlling, eliminating and minimising risks; and monitoring and reviewing results.
- Developing and maintaining WHS objectives to continually improve the WHSMS and WHS performance.
- Providing clear, effective cooperation and consultation between management and workers, and their representatives.

Implementing our commitment

The MPC WHSMS demonstrates our commitment to providing a safe and healthy work environment for our workers by:

- Providing relevant, up-to-date WHS information to all workers on matters such as workplace safety and their responsibilities;
- Providing expert assistance in WHS matters where necessary;
- Providing instruction and/or training in work processes where appropriate;
- Developing and implementing safe systems and processes, including hazard identification, and appropriate remedial action to eliminate or control hazards; and
- Implementing and maintaining appropriate information, reporting and statistical systems.
